

Introduction

JK Tech is a next-generation Digital and IT services provider enabling clients globally to navigate their digital transformation. JK Tech stands by its vision of being "committed to a superior experience" with its customers, its people, and its social environment. With strong capabilities in Retail & Consumer Products and Insurance, we drive enterprise transformation through Generative AI, Cloud, and Data-driven modernization. Our Gen AI Orchestrator JIVA, recognized by Everest and Gartner and strengthened through partnerships with leading cloud hyperscalers, helps enterprises unlock the true potential of their data by seamlessly integrating with existing systems to deliver measurable business outcomes. JK Tech is now inviting talented Engineering and Statistics graduates (2025) to be part of this exciting growth journey.

Job Description

We are looking for a Software Engineer/Developer to join our cutting-edge development team as it grows. We seek individuals who are curious, ask "why," and think beyond conventional approaches. The ideal candidate is a divergent thinker who understands industry best practices and has experience with multiple programming languages. They should be a team player with strong analytical and technical skills, capable of clearly explaining the reasoning behind technical decisions to non-technical stakeholders. The candidate must also be comfortable working in an agile environment and willing to "take the wheel" when necessary.

Responsibilities

Selected candidates will be trained to work in the following areas:

- Develop innovative, scalable, and fault-tolerant software solutions for clients and customers
- Collaborate closely with project managers, UX designers, developers, systems analysts, graphic artists, and sales & marketing professionals
- Write and test code to ensure compatibility and stability; refine and rewrite as necessary
- Prepare clear technical specifications

Skills and Qualifications

- Bachelor's degree in Software Engineering, Information Technology, or Statistics from a premier institute/university
- Practical hands-on experience in software development using programming languages such as Java, C++, Python, or others
- Strong understanding of computer architecture, OOPS, and data structures
- A strong learning attitude with good communication skills
