

Futures First Interview Experience (Kolkata) – June 2026

Recruitment Timeline

- Futures First visited our campus through Superset around **May 11–12**.
- PPT/Pre-Placement Talk was conducted on **May 27**.
- Online Assessment (OA) was held on **May 28**.
- Approximately **177 candidates** were shortlisted for the OA.
- After the OA, only **73 candidates** were shortlisted for the onsite interview round in Kolkata.
- Interviews were scheduled on **June 3, 4, and 5**.

Note: From what I observed, the initial OA shortlist seemed to focus mainly on candidates from Eastern and Northern states such as West Bengal, Odisha, Jharkhand, Bihar, Uttar Pradesh, and Tripura.

My Interview Details

- Date: **June 3, 2026**
 - Time: **12:40 PM**
 - Duration: Approximately **25 minutes**
 - Language: **Hindi**
 - Interviewer: [Abhishek Agarwal \(CA\)](#)
-

Important Mistake Before the Interview

I arrived around **15 minutes late**, and my resume was rolled instead of being kept flat in a folder.

The interviewer immediately pointed out both issues. At the end of the interview, he again emphasized the importance of punctuality and professionalism.

My advice: Arrive early and carry your resume properly in a folder.

Interview Questions

1. Family Background

The interview started with basic questions about my family and background.

2. Why Do You Want to Join Futures First?

I answered that:

- I have strong analytical thinking skills.
 - I enjoy probability and logical reasoning.
 - I believe I can be a valuable asset to the company.
-

3. Mental Math Questions

The interviewer quickly asked:

Q1. What is 6^2 ?

I answered:

36

Q2. What is 36^2 ?

Instead of giving the exact answer (1296), I gave an approximation.

Q3. What is 7^3 ?

I answered incorrectly (349).

Correct answer:

343

4. Risk Management Question

After my wrong answer to 7³, the interviewer asked:

If I give you ₹10 lakh, how much money would you bet that your answer is correct?

I replied:

₹1–2 lakh.

He then asked:

Is your answer actually correct?

I admitted it was probably not.

He then challenged me:

If you are not confident, why would you bet money on it?

Lesson

This was not a math question.

It was a test of risk management and decision-making under uncertainty.

5. Banking and RBI

Q. What is the Central Bank of India?

I answered RBI but also started mentioning SBI and other public sector banks.

The interviewer corrected me and said that RBI is the only central bank.

Q. Who is the Governor of RBI?

I could not remember the full name.

I tried mentioning deputy governors, but the interviewer interrupted and told me to answer only what was asked.

Lesson

Answer precisely and avoid unnecessary information.

6. Finance and Current Affairs

Q. Tell me the top financial news currently.

I mentioned:

- Crude oil price movement
- Inflation concerns
- RBI-related developments

The interviewer asked follow-up questions regarding global events and inflation.

Q. What is inflation?

I explained inflation.

During my answer I mentioned Purchasing Power Parity (PPP).

Q. What is Purchasing Power Parity?

He then asked me to explain PPP.

7. Economics Question

Q. If a country is heavily dependent on exports, would it prefer a strong currency or a weak currency?

I answered:

Strong currency.

I later realized that a relatively weaker currency often helps exports remain competitive internationally.

8. NIFTY 50

Q. What is NIFTY 50?

I answered correctly.

Q. What was today's NIFTY opening price?

I was able to answer correctly.

This was probably one of my better responses in the interview.

9. Why Should We Hire You?

I answered:

- Strong probability and analytical thinking skills.
 - Ability to work in different shifts.
 - Adaptability.
-

10. Logic Puzzle

Puzzle

There are three jars:

- Red
- Blue
- Mixed

Each jar is labeled incorrectly.

How many balls must be drawn to correctly identify all jars?

I answered:

50

This was incorrect.

(The classic solution requires drawing only one ball from the jar labeled "Mixed".)

11. Trading Experience

Q. Do you have any trading experience?

I answered that my father trades occasionally, but I personally do not trade.

The interviewer stopped me and said:

This is your interview. Why are you talking about your father's experience?

Lesson

Always answer based on your own experience.

12. What Does Futures First Do?

Q. Do you know what our company does?

I answered:

Futures First is a proprietary trading firm that trades derivatives such as futures and options.

Q. What are Futures and Options?

I explained both concepts correctly.

13. Questions for the Interviewer

I asked:

What makes Futures First different from other trading firms?

The interviewer replied that much of the trading here is still manually executed by traders, whereas many firms rely heavily on algorithmic trading.

14. Future Education and Career Goals

Q. Do you have plans for higher studies?

I replied:

If I get a job, my immediate priority would be to gain industry experience.
However, I am open to pursuing higher studies in the future while working.

I also mentioned that I want to continue learning about AI and explore ways to incorporate AI tools into my everyday work to improve productivity and decision-making.

Lesson

The interviewer appeared interested in understanding my long-term career plans and whether I viewed this role as a short-term stop or a serious career opportunity.

Future candidates should be prepared to discuss:

- Higher study plans (MBA, MS, etc.)
 - Long-term career goals
 - Why they are interested in trading/markets
 - How they plan to develop their skills over time
-

Additional Economics Questions

Q. What are Monetary Policies?

The interviewer asked about monetary policy.

I honestly told him that I did not have sufficient knowledge about the topic and could not answer confidently.

Q. What is Fiscal Health?

He also asked about fiscal health.

Again, I admitted that I was not familiar enough with the concept to provide a proper answer.

Lesson

Apart from trading concepts and mental math, the interviewer also tested basic macroeconomics and finance knowledge.

Future candidates should revise:

- Monetary Policy
 - Repo Rate
 - Reverse Repo Rate
 - CRR
 - SLR
 - Open Market Operations
 - RBI's role in controlling inflation
- Fiscal Policy
 - Government spending
 - Taxation
 - Fiscal deficit
 - Budget deficit
- Fiscal Health
 - Government debt levels
 - Fiscal deficit trends

- Revenue vs expenditure

These topics can appear as follow-up questions when discussing inflation, interest rates, RBI actions, or current financial news.

Final Discussion

Before ending the interview, the interviewer spent a few minutes discussing:

- The importance of punctuality.
- Professional conduct.
- Where I currently live.

I explained that I had spent around 14 years in West Bengal but currently live in Odisha.

After that, he returned my resume and concluded the interview.

Overall Impression

This interview focused heavily on:

- Mental mathematics
- Risk management
- Logical thinking
- Economics
- Financial awareness
- Current affairs
- Trading knowledge
- Precision in communication

One thing I noticed is that the interviewer often preferred short and direct answers.

Also none of the interviewers looked at anyone's resume, it was just for formality.

Whenever I added extra information, he redirected me back to the original question.

Advice for Future Candidates

1. Be on time.
2. Carry your resume properly.
3. Practice mental math daily.
4. Know NIFTY, RBI, inflation, GDP, currency movements, and major financial news.
5. Learn basic futures and options concepts.
6. Practice probability and logic puzzles.
7. Answer exactly what is asked.
8. Be prepared for risk-management-style questions, not just factual questions.
9. Read market news regularly before the interview.
10. Stay calm even if you make mistakes.

—

FINAL VERDICT:

I was immediately rejected after 3 min when the interview ended.

LOL THEY SELECTED 0 CANDIDATES FROM MY COLLEGES.
