Marks : 2

MARK/UNMARK FOR REVIEW

A train of 10 crabs cross a muddy patch of land in exactly 50 minutes. This 50 minutes is the time from the instant the 1st crab stepped on the muddy patch and the last crab left the muddy patch. The crabs crossed in single file and the muddy patch is long enough to accommodate only 8 crabs at any one time. The crabs travelled at uniform speed and each crab was on the patch for the same amount of time. For how long was each crab on the muddy patch, from the instant it stepped on the patch to the instant it stepped off (in minutes)?

Please Select the appropriate choice.
