About Us:

IndiaMart - A One-Stop Shop solution for all Businesses, IndiaMart is a 29-year-old organization. It is India's Largest B2B Marketplace and a one-stop expert solution for all business needs, empowering **82 lakh suppliers** by connecting them with **~20.6 crore buyers** across the nation.

In this Era of the E-Commerce Industry and Digitalization, We are the only market leaders having 60% market share in the B2B e-commerce industry.

Why Join IndiaMART:

At IndiaMART, you don't just build a career — you grow, thrive, and become part of something bigger.

 **Growth Opportunities at IndiaMart** - Our people are our greatest strength — the true superheroes behind our success. We are committed to empowering every IndiaMARTian with continuous learning, career advancement, and personal development opportunities that fuel both individual and organizational growth.

iLEAD (Leadership Experience & Development Program)

3 Year program aimed at preparing new joiners for leadership positions in their respective area of expertise. Members in this program will get a 10% bonus raise (over & above Annual Appraisal) once each of their joining anniversaries occurs while they are enrolled in this program. This program will offer a variety of learning experiences tailored to the individual's needs an organizational goals.

 **ILEAP Policy** - Learn - Grow - Get Rewarded. At IndiaMART, employees can enroll in educational programs of their choice and get reimbursed upon successful completion. We also sponsor learning at top institutes like **IIM Ahmedabad and FMS** to sharpen skills and accelerate growth.

About the role:

We're looking for ambitious AI Enthusiasts to join our Marketplace & Business Intelligence Team to build real-world intelligent systems that impact millions of users & solve for real time business Use-Cases.

You'll work alongside experienced Product & Engineering teams, & work hand on cutting-edge technologies like LLMs, agentic systems, and multimodal AI while contributing to products that drive actual business outcomes.

Key & Technical Skills:

- Strong programming fundamentals (Python, data structures, algorithms)
- Basic understanding of AI / machine learning concepts and eagerness to learn
- Analytical mindset with attention to data patterns and metrics
- Ownership mentality - you see problems and want to solve them
- Clear communication skills and collaborative approach
- Comfort with ambiguity and fast-paced learning
- Interest in building systems that handle real-world, messy data.

You'll Learn and Contribute To:

- Participate in all phases of the SDLC, including planning, design, development, testing, deployment, and maintenance
- Working along with cross functional teams in different stages of the projects
- Collaborate Analyze and refine technical requirements with stakeholders and business owners to ensure they align with business objectives and technical feasibility
- Develop software solutions by studying information needs, conferring with users, and studying systems flow, data usage, and work processes
- Conduct code reviews and provide constructive feedback to peers
- Building AI agents and automated workflows using LLMs
- Implementing data pipelines for AI/ML systems
- Working with tools like LangChain, LangGraph, and cloud AI services
- Designing feedback loops that improve system performance
- Collaborating with business teams to understand requirements and measure impact
- Following software engineering best practices for AI systems

Eligibility Criteria

- B. Tech/ B.E. (preferably in CS/ IT)
- Familiarity with basic ML libraries
