

Analyst – Testing and Quality Assurance Engineer

Are you ready to transform your tomorrow with WTW? With 48,000 colleagues in over 140 countries, we help organizations make forward-thinking choices about their people, their investments and the risks they face.

In our cross-functional Individual Marketplace team, we develop and build out the next generation of health insurance marketplace products. Over 130 Fortune 500 companies use our Via Benefits Individual Marketplace platform – allowing millions of their people to make critically important healthcare decisions with confidence. Join the team and help us continue to lead the way in our industry.

The role

You'll become part of a global team focused on creating the next generation of our Via Benefits platform. Working with and learning from experienced colleagues, you'll contribute to the full software development lifecycle, from design and construction to testing and deployment.

Your role will involve:

- Following the agile software testing and quality assurance methodology
- Supporting requirements gathering, test planning and execution, and the investigative analysis of defects to verify code changes during development
- Helping to test performance, security, accessibility and user acceptance
- Writing bug reports and verifying bug fixes
- Championing testing and effective test automation using C# on .NET core
- Developing a suite of complex automated tests supporting code releases and exploring new opportunities to increase automated testing
- Troubleshooting web applications – verifying issues, identifying their causes and working with product management teams to resolve them
- Using performance monitoring tools to track system behavior and identify opportunities for optimization
- Using perform manual and automated security tests, to ensure the application is fortified against security threats
- Understanding and following development best practice
- Helping to set up and configure test environments.

The requirements

To start building your future career with us, you will need:

- 80% or above in 10th and 12th
- A minimum of 65% marks or CGPA 6.5 in all semesters.

- A good understanding of object-oriented programming, data structures and relational database management systems
- An eagerness to gain and share new information and knowledge
- To be a technical and analytical thinker
- Excellent communication skills, both verbal and written
- The ability to work effectively in an agile team environment

Please note that a maximum gap of one year is permissible after HSC (12th) and not after SSC (10th) or in between semesters of graduation.

The application process

- Stage 1: Online application and recruiter review
- Stage 2: Video on demand interview
- Stage 3: Technical test
- Stage 4: Final interview
- Stage 5: Offer and onboarding

We're committed to equal employment opportunity and provide application, interview and workplace adjustments and accommodations to all applicants. If you foresee any barriers, from the application process through to joining WTW, please email candidate.helpdesk@willistowerswatson.com.
