

Junior Software Engineer

Are you ready to transform your tomorrow with WTW? With 48,000 colleagues in over 140 countries, we help organizations make forward-thinking choices about their people, their investments and the risks they face.

In our cross-functional Individual Marketplace team, we develop and build out the next generation of health insurance marketplace products. Over 130 Fortune 500 companies use our Via Benefits Individual Marketplace platform – allowing millions of their people to make critically important healthcare decisions with confidence. Join the team and help us continue to lead the way in our industry.

The role

You'll become part of a global team focused on creating the next generation of our Via Benefits platform. Working with and learning from experienced colleagues, you'll actively support the full software development lifecycle, from design and construction to testing and deployment.

Your role will involve:

- Researching, analyzing, designing, developing, testing and deploying applications using C# on .NET, Web and SQL Server technologies.
- Building full-stack software to meet business needs
- Helping to build software primarily using C# on .NET / .NET Core, along with HTML5, JavaScript, CSS and React
- Taking responsibility for unit testing, coding, debugging and error resolution
- Working with cross-functional teams to analyze, design and ship new features
- Supporting users and clients in resolving issues
- Understanding and following development best practice
- Writing DDL code to make changes to the database backend

The Requirements

To start building your future career with us, you will need:

- 80% or above in 10th and 12th
- A minimum of 65% marks or CGPA 6.5 in all semesters.
- An interest in, and a passion for, software engineering
- An up-to-date knowledge of software development tools and techniques
- A good understanding of object-oriented programming, data structures and relational database management systems
- An eagerness to gain and share new information and knowledge
- To be a technical and analytical thinker

- To be comfortable working in a team environment
- Strong communication skills, both verbal and written

Please note that a maximum gap of one year is permissible after HSC (12th) and not after SSC (10th) or in between semesters of graduation.

The application process

- Stage 1: Online application and recruiter review
- Stage 2: Video on demand interview
- Stage 3: Technical test
- Stage 4: Final interview
- Stage 5: Offer and onboarding

We're committed to equal employment opportunity and provide application, interview and workplace adjustments and accommodations to all applicants. If you foresee any barriers, from the application process through to joining WTW, please email candidate.helpdesk@willistowerswatson.com.
