

Job Description

We are seeking enthusiastic and motivated Graduate Engineering Trainees to join our technology team, focusing on digital transformation, SAP solutions, IT Infrastructure / Communication and Information & Cyber Security.

This entry-level position is designed to provide comprehensive training and hands-on experience in the design, development, and implementation of cutting-edge enterprise solutions under the guidance of senior professionals. The ideal candidate will be a self-starter with a passion for problem-solving and a keen interest in bridging the gap between engineering principles and business processes.

Key Responsibilities & Duties

- **Training & Development:** Participate in extensive on-the-job training sessions to gain deep knowledge of IT Infrastructure, Information & Cyber Security, SAP modules (e.g., S/4HANA, FICO, MM, ABAP) and digital technologies (e.g., cloud integration, AI, web development).
- **Solution Design & Development:** Assist in the design, development, testing, and troubleshooting of software applications and SAP functionalities. This includes working with programming languages and modern development methodologies like Agile.
- **Business Process Mapping:** Collaborate with functional and business teams to understand requirements, map business processes to SAP best practices, and identify customization needs.
- **Documentation & Reporting:** Create and maintain thorough technical specifications, functional documentation, test scripts, and user manuals.
- **Support & Maintenance:** Provide support for existing software/SAP applications, troubleshoot issues, and assist in implementing bug fixes and enhancements in a timely manner.
- **Collaboration:** Work effectively within cross-functional, often geographically dispersed, teams and communicate complex technical information to non-IT personnel clearly.
- **Continuous Improvement:** Stay informed on the latest industry trends, emerging technologies, and best practices, proactively suggesting improvements to processes and solutions.

Qualifications & Skills

Education: Bachelor's degree in an Engineering discipline, such as Computer Science, Information Technology, Electronics / Electrical, or a related field (BE/B.Tech).

Technical Skills:

- Foundational knowledge of networking, operating systems, cloud computing, and security fundamentals.
- Fair understanding of business processes in process / manufacturing industry.

- Basic understanding of programming fundamentals in languages like Python, Java, JavaScript, or C++ / SAP ABAP.
- Familiarity with database concepts (SQL) and the software development lifecycle (SDLC) is desirable.
- Basic knowledge of ERP systems, especially SAP, is an advantage.

Soft Skills:

- Strong analytical, problem-solving, and critical-thinking abilities.
- Excellent written and verbal communication skills.
- A positive attitude, high energy, and the ability to work in a fast-paced, dynamic environment.
- Strong teamwork and interpersonal relationship skills.
- A growth mindset, willingness to learn, and adaptability to new technologies and methodologies.
